

SAFETY DATA SHEET

Product: Straightening Cream for Hair
Commercial Name: **FRAMESI STRAIGHTENING SYSTEM STRONG 280 ml**

Chemical-physical characteristics

Physical State: cream liquid gel **Smell:** Ammonia
Non ammonia

Mixture to avoid: Avoid mixing with other kinds of product, or with similar products of other companies, or with other substances not directly mentioned in the instructions included in the product.

Labelling by law

CEE Cosmetic Law

Indications: Avoid contact with eyes. Rinse eyes immediately if product comes into contact with them. Wear suitable gloves.

Caution: FRAMESI STRAIGHTENING SYSTEM is a professional product formulated exclusively for use by hairdressers. The manufacturer shall not be liable for any errors caused by nonprofessional use. Please carefully read the instructions before starting the treatment. Always wear disposable gloves while using the product. Contains thioglycolates. Avoid contact with the eyes. In the event of contact with the eyes, rinse immediately and abundantly in water and consult a doctor. Keep out of the reach of children. For further information go to www.framesi.it

Warnings: For professional use only. Contains thioglycolate. Follow the instructions. Scan QR code.

Product information

Health warning: This product contains substances which may cause skin irritation.

In case of emergency contact: Framesi SpA, Milan Italy – Tel.02/99040441

INTERNET: www.framesi.it

Toxicological information

Eyes / skin contact: Avoid contact with eyes and mucous membrane.

Inhalation: Do not inhale for long periods. Operate in well-ventilated areas.

Product: Straightening Cream for Hair

Commercial Name: **FRAMESI STRAIGHTENING SYSTEM STRONG 280 ml**

Storage

Store the product in dry and well-ventilated areas. Keep well out of reach of children.

Handling standards

Prior to using the product protect the hands by applying suitable gloves covering the forearms during the entire process i.e. application and rinsing. All tools and accessories must be perfectly clean. Avoid contact with eyes.

Avoid nickel instruments. Operate in well-ventilated areas.

Emergency intervention

1. First Aid in case of:

- **Eye / skin contact:** Rinse immediately with plenty of water. In case of persistent irritation, consult a doctor.
 - **Accidental ingestion:** Drink large amounts of water, call a doctor.
 - **Inhalation:** No problem in normal conditions. Should inhalation occur due to process not being carried out in well-ventilated areas, and in the presence of high humidity, the person should be conducted into the open air. In cases of persistent irritation of the primary respiratory organs, call a doctor.
2. **Loss or leak:** If possible collect and discard the leaked product and wash the area with water. Never attempt to put any leaked product back into the original container i.e. any leaked product should not be used.
 3. **Classification of waste products:** The empty tubes, which contained the product, are not classified as toxic or harmful waste products. The non-utilized tubes (damaged, etc.) should be disposed of in accordance with the law on waste products.
 4. **Fire:** Use water or CO₂.

The present information is based on the present level of knowledge about the product and will be brought up to date when new data arises.
